Straight and simple diabetes management

- Simplify your diabetes management by syncing all your data in one comprehensive site, including glucometers, insulin pumps, CGMs, and smartphone apps.
- Every diabetic is different! Personalize what data you track and how you visualize it. Use the same devices and apps you already know and love.
- Set individual goals that make sense for your treatment plan.
- No more pouring aimlessly through your graphs and data on multiple sites. We'll help you find correlations! You and your medical team decide what's important.
- Connect with your medical team and share via social media.

Enter Email Address

Use your smartphone.
We know every diabetic is different, and so are the apps you use to track your diabetes, lifestyle, health and wellness. Below are some of the mobile apps you can use to sync data to your Pixel account.

Data Mine Your Own Diabetes Data to Discover New Correlations

- 1. Import Your Data**
Sync your diabetes, health, and lifestyle devices. From insulin pumps and glucose meters to Fitbit™ and Nike+ FuelBand™, import all your data in order to create a higher resolution snapshot of your overall health and optimized diabetes management.
- 2. View Your Data**
You are in control of your own data! You offer a number of preset filters you can view your data, or you can create your own custom filters. After all, it's your data, shouldn't you be in control of how it is displayed instead of a one-size fits all approach?
- 3. Analyze Patterns**
You have the option of running our algorithms on your data to help you find hidden patterns. Be sure and discuss these patterns with your medical team. You might be surprised to see how unnoted variables can have a big effect on your glucose levels.

COMPATIBLE WITH DATA FROM MANY OF YOUR FAVORITE DIABETES, HEALTH AND FITNESS DEVICES

fitbit Animas asante dexcom ACCU-CHEK
OmniPod GARMIN Medtronic JAWBONE mio

Sync apps and devices that you already use

There is no one-size-fits-all treatment plan for diabetes. Personalize what you track and how you track it using the apps and devices you already know and love.

Give your BG numbers individualized context to help you and your medical team set small goals that will be attainable for your lifestyle and have a big impact on your diabetes.
